Revenue Trend Over Time

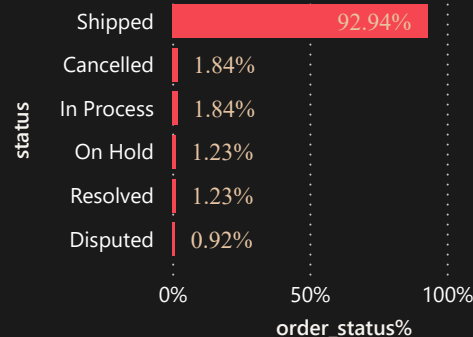

Revenue vs. Margin by Product Line

Revenue Share by Territory

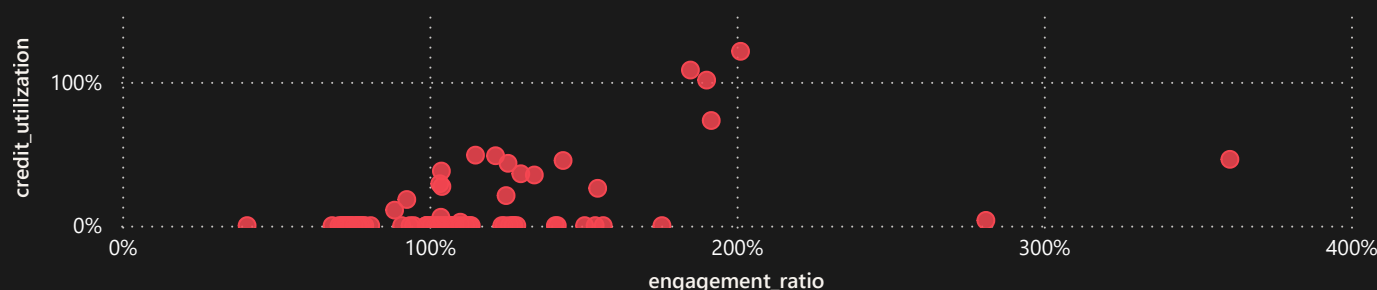

Order Fulfillment Breakdown

Key Findings

- ⚠️ **No new customers since 2004.** Growth now depends entirely on existing accounts.
- 🌟 **One person runs all of Japan.** Mami Nishi drives 4.76% of total revenue alone — no manager, no backup.
- 💰 **\$750K+ unpaid — and it's blocking shipments.** Every stuck order traces back to unpaid balances.
- 🏠 **Real room to sell more.** Top customers use just 10% of their available credit.
- 🏆 **Motorcycles are the most profitable line** — Trains are the weakest, on revenue and margin.

Top 3 Profit Drivers

Volume vs. Margin — Spotting the Trade-offs

Lowest Profit Contributors

Not all products earn their shelf space

- **Stock more:** 1992 Ferrari 360 Spider, 1952 Alpine Renault 1300, and 2001 Ferrari Enzo — each pulling \$90K+ profit. Lean into these.
- **Drop or review:** 1982 Ducati 996 R, Boeing X-32A JSF, and 1939 Chevrolet Deluxe Coupe — under \$11K profit each across 2.5 years, next to \$3.83M total. Barely moving the needle.
- **Trains** — lowest revenue *and* lowest margin (~35%). Weak on both fronts.
- **Motorcycles punch above their size** — smaller revenue than Classic Cars, but the best margin in the catalog (41.8%). Worth prioritizing in the next marketing campaign — more revenue here converts to profit more efficiently than anywhere else in the catalog.
- **Bottom line:** profit isn't about volume — it's about picking the right products. ✨

Key Insights

⚠ Staffing gap: Japan is understaffed at the management level — 2 reps, no dedicated Sales Manager, one informally covers the other.

🏆 Top performer: Gerard Hernandez leads all sales reps with \$1,258,577.81 in revenue.

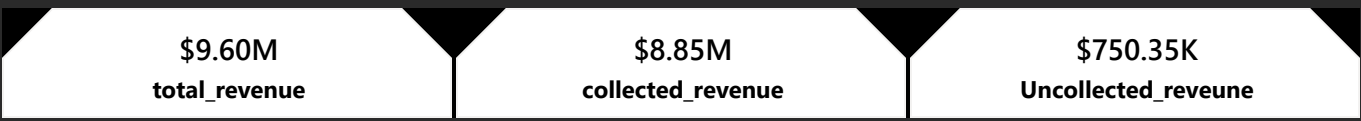

📧 Underperforming reps: Tom King and Yoshimi Kato show \$0 in recorded revenue.

🌸 Japan's backbone: Mami Nishi single-handedly generates \$457,110.07 — **4.76%** of total company revenue — while informally managing Yoshimi Kato with no formal Sales Manager above her. A strong performer, but also a single point of failure if she ever leaves.

Reporting Hierarchy — Revenue by Level

Order & Payment Health

Key Insights

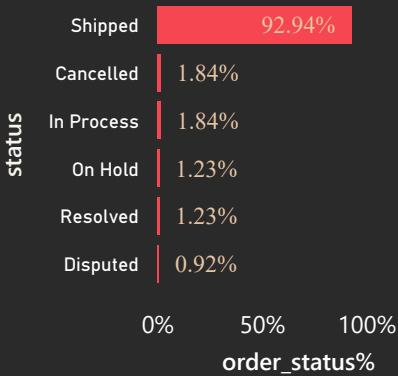

- ⚠️

APAC is struggling to get orders out the door. Highest cancellation rate of any region (5.26%), plus more disputes and stuck orders than anywhere else.
- 💰

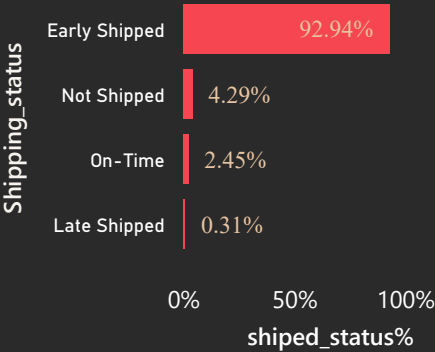

EMEA is owed the most money — \$377,217.48 — and one customer is most of the reason. Euro+ Shopping Channel alone owes \$104,950.56 — more than a quarter of everything EMEA hasn't collected, and the single biggest unpaid balance of any customer, in any region.
- 🌟

Japan gets paid every single time — \$0 unpaid. But it's also the slowest to ship, with the highest late-ship rate of any region (6.25%, based on a small order count for this territory). One person runs the whole operation, no manager backing her up. She's collecting perfectly, just not shipping fast.

Comments-driven insights

 **Every "On Hold" order has the same root cause: unpaid balances.** All On-Hold orders are stuck for one reason — the customer's credit limit was exceeded. This proves the uncollected revenue problem doesn't just sit on a balance sheet, it actively stops new orders from shipping.

 **Product complaints repeat.** "Doesn't match the described scale" and "poor color/precision" each show up more than once, across different years — a real, recurring quality perception issue, not isolated incidents.

status	comments
Cancelled	Customer called to cancel. The warehouse was notified in time and the order didn't ship. They have a new business plan for 2005 Sales and are shifting their sales model. Our VP of Sales should contact them.
Cancelled	Customer cancelled due to urgent budgeting issues. Must be cautious when dealing with them in the future. Since order shipped already we must discuss who would cover the shipping charges.
Cancelled	Customer disputed the order and we agreed to cancel it. We must be more cautious with this customer moving forward, since they are very hard to please. We must cover the shipping fees.
Cancelled	Customer heard complaints from their customers and called to cancel this order. Will notify the Sales Manager.
Cancelled	Order was mistakenly placed. The warehouse noticed the lack of documentation.
Cancelled	This customer found a better offer from one of our competitors. Will call back to renegotiate.
Disputed	Customer claims container with shipment was damaged during shipping and some items were missing. We are currently talking to FedEx about this.
Disputed	Customer claims the scales of the models don't match what was discussed. I keep all the paperwork that can prove otherwise.
Disputed	Customer doesn't like the colors and precision of the models.
In Process	Custom shipping instructions were sent to warehouse.
On Hold	Customer credit limit exceeded. Will ship when a payment is received.
On Hold	The outstanding balance for this customer exceeds their credit limit. Order will be shipped when a payment is received.
Resolved	Disputed then Resolved on 3/15/2005. Customer doesn't like the craftsmanship of the models.
Resolved	Order was disputed and resolved on 12/1/04. The Sales Manager was involved. Customer claims the scales

Key Insights

✅ **Some big customers barely spend what they're allowed.**

Mini Gifts Distributors, Australian Collectors, Downunder Souvenirs, and Remis Collectables spent 70-150%+ of their limit in the past but owe close to 0% now — safe, proven, room to sell more.

🇺🇸 **There's real room to sell more.** Top 10 customers by credit limit use just 10.10% of it on average — real opportunity, though not all of it will convert.

🔍 **"Never ordered" isn't one story.** Some of the 24 who never bought have a \$0 credit limit — a setup gap, not a missed sale.

Extra context:

💰 **Euro+ Shopping Channel isn't a risk, just big.** 360.58% engagement, 46.11% owed. They buy well beyond their limit and still pay it down steadily — their \$104,950.56 unpaid balance (Q4) is a scale effect, not a warning.

⚠️ **A few customers are in over their heads.** Sharp Gifts Warehouse, Tekni Collectables, and Gift 4 All Ages all exceed 100% utilization — Gift 4 All Ages worst, at 201.29% engagement and 121.26% utilization.

Credit Utilization — Top 10 by Limit

Summary

Most of it was straightforward: fixed data types, renamed columns, dropped fields I didn't need. A few things needed real thinking though:

"NA" almost fooled me into deleting real data. It looked like a missing value, but it actually means North America. Filling it in would've wiped out real info for every US/Canada record.

The President's blank "reports to" field is supposed to be blank. Everyone reports to someone — except her. That blank marks the top of the org chart. Filling it in would've broken the hierarchy.

Some orders have no ship date — also correct. If an order's cancelled or still processing, it hasn't shipped. I left it blank on purpose; now it helps flag stuck orders.

The sales hierarchy needed more than a normal table relationship. A regular relationship can't climb "manager's manager's manager." I used PATH and PATHITEM to trace the chain and build a real 4-level structure: President → VP → Manager → Rep.

One real find: Tokyo has no Sales Manager — a senior rep informally manages another rep. Every other office follows the same 4-tier setup; this one doesn't.

Everything else — types, renaming, blanks — was handled the same way across all 8 tables. Full details in my project notes.
